international boardsportstyling

Your graphic on FleeceOn/silk
(-for lamination into board)

Data format:

Vector graphic:

(Freehand™, Illustrator™, CorelDraw™)

save it as pdf, ai or eps.

Send it as zip-file.

Photo- or pixelgraphic:

the resolution should be min. 140 dpi related to the real
boardsize.

Save it as jpg (best Quality).

We will check the files and send you a note if they're ok.
(for control we'll send you a small jpg or screenshot of your
graphic)

Would be best if you apply the data as rectangle (width + length
-add.1 cm on each side). so your Shaper can cut the fleece off in
the shape of your chosen board.

Advice: If file is too big (more than 8mb), store it on a
FTP-server (as zip.) and tell us the link for download.

-You can also store it at www.yousendit.com or www.sendspace.com
(very easy to handle).
